ECT-10

EMERGENCY COMMUNICATIONS TRAILER

Compact, Powerful Communication Trailer

The ECT-10 is a compact mobile communications trailer designed to quickly establish a fully operational network inclusive of voice, data, cellular, and radio systems. The intuitive design enables rapid deployment within 15 minutes and the use of auto-acquire satellite as the backhaul enables connectivity no matter where you are.

Exceptional Mobility and Easy Deployment

- Weighing less than 5,000 pounds, the ECT-10 can be easily towed by most standard vehicles, airlifted, or even transported via plane.
- Its compact design allows quick and effortless deployment in hard-to-reach or densely populated urban areas, overcoming limitations of larger command trailers.

Unparalleled Power and Global Communication Capabilities

- The ECT-10 is powered by a robust Cummins Onan 12,000-watt Quiet Diesel generator with an 80-gallon fuel tank, ensuring reliable operation in various environments.
- Its SAT auto acquire satellite system provides global network access, facilitating internet service, data access, and two-way voice communication through Hosted VoIP and SIP, regardless of location.

Dimensions

- Length: 15' 3"
- Width: 7' 7"
- Height: 9' 9"
- Weight: Approximately 3,600 lbs
- It can be towed by a ½ ton vehicle

Robust Equipment and Advanced Antenna Mounting

- The ECT-10 is equipped with a 30 to 45-foot pneumatic mast, suitable for mounting a diverse array of antennas including those for mobile radios, weather monitoring, commercial cellular, and video surveillance.
- The unit integrates a 360-Track GPS system, ensuring precise location tracking and providing valuable security alerts.
- Build out available to accommodate Geo-Stationary(GEO) or Low Earth Orbit(LEO) satellite systems.

Optimized & Secure Equipment Storage

- Comes with a climate-controlled cabinet featuring three 21u equipment racks mounted on airbags for added safety.
- Offers a secure, lockable middle storage compartment for additional equipment.
- Climate control provided by a 7,000 BTU heating and AC unit to ensure optimal equipment performance.

Optional Add-On Shelter and Workspace*

- Optional custom 10X10X8 inflatable shelter that attaches to the trailer's rear, providing easy and complete equipment access.
- When used, the shelter comfortably accommodates up to seven users and can be easily stored in a compact bag for convenient transportation.

**This is an optional add-on. For pricing details on the shelter, please contact our sales team.*
